

Triggering a Manual Build in Jenkins

Steps:

1. Login to Jenkins: <https://jenkins.company.com>
2. Navigate to the appropriate job (e.g., [frontend-deploy](#))
3. Click **Build with Parameters**
4. Enter:
 - Branch: [main](#)
 - Environment: [staging](#) or [production](#)
5. Click **Build**
6. Monitor logs for success

Notes:

- Use staging for QA validation
- All builds are logged under [Build History](#)
